NOV 22 1982

CERTIFIED MAIL  
RETURN RECEIPT REQUESTED

Mr. R. O. Quinby  
Manager, Plant Engineering and  
Construction  
General Electric Company  
P.O. Box 4840  
Syracuse, New York 13214

To: General Electric Company Electronics Parkway Plant  
ID No. NY069365120

Dear Mr. Quinby:

Section 3005 of the Resource Conservation and Recovery Act (RCRA) mandates the Environmental Protection Agency (EPA) to establish a program requiring permits for hazardous waste treatment, storage, and disposal facilities. EPA has issued regulations to implement this permit program, which are published at 40 CFR Parts 122, 261, 264 and 265.

Pursuant to these regulations, you have already submitted Part A of your permit application. This letter constitutes an official request for Part B of the application for the above-referenced facility. Your application must be submitted by no later than May 21, 1983. Please note that your failure to submit the necessary information by the required date may be grounds for termination of interim status pursuant to 40 CFR 122.22 (a)(5).

In order to prepare your Part B application and make any necessary revisions to your Part A application, you may need to refer to the following:

1. 40 CFR 122.28: The summarized contents of the Part B application. This document (current as of July 1, 1981, with copies of subsequent revisions attached) has been enclosed for your convenience. We recommend that your application reflect either the order of the Part B contents set out in this regulation. This should assist you in determining the completeness of your submittal.

2. 40 CFR Part 361: The identification and listing of hazardous waste. This regulation has been extensively amended since you submitted your Part A application. In order to insure that your submittal is current, we recommend that you review your operating in light of this current list.

3. 40 CFR Part 364: Standards for hazardous waste treatment, storage and disposal facilities. This regulation sets forth the technical standards which must be met by these facilities.

All of the above-cited regulations were published in the Code of Federal Regulations revised as of July 1, 1981. For your convenience, we have also enclosed a list of all of the pertinent amendments to these regulations made subsequent to that date. A new revision, current as of July 1, 1982, should be available shortly from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20407.

Also enclosed for your reference is a copy of "A Guide for Preparing RCRA Storage Permit Applications." Although this document is in preliminary form, it contains useful guidance for preparing Part A permit applications.

Please be advised that, although your application is not due until the above-referenced date, early submittals are encouraged. This will serve to expedite the review of your application and the subsequent issuance of a permit. All submittals should be made to:

Ernest A. Brown, Chief  
Radioactive Waste Branch  
U.S. Environmental Protection Agency  
26 Federal Plaza, Room 503  
New York, New York 10278

In order to expedite the regulatory review, EPA is requesting that three copies of the application be submitted with the original.

should you wish to discuss the contents of the Part H application or this letter, please contact Mr. Robert Garrity of my staff at (212) 264-1317.

Sincerely yours,

Conrad Simon  
Director  
Air and Waste Management Division
